

## Participation Berliner Energietage 03.05. - 05.05.2017

As the most outstanding annual conference of energy transition („Energiewende“) in Germany, Berliner Energietage (Berlin Energy Days – BET) attracted up to 9.000 attendees. In 50 specialist events - panels, discussions and workshops - 300 speakers instructors were providing an overview of most recent economic developments, political trends and technical advances.

Regarding innovative educational approaches a prerequisite to improve an overall awareness of environmental issues, UBB e.V. was actively involved in the expert's discussion „For a proactive educational and climate neutral Berlin“

In addition Mrs. Winter attended several meetings more, as for example a panel dealing with sustainable reconstruction and a meeting on socially and environmentally sustainable transformation of energy-supplying infrastructure („Urban Heat Transition“). She used contacts made during the trade fair / exhibition to generate up-to-date knowledge, which will be reflected in the upcoming educational concept's curriculum.

First of all, raising awareness of our ERASMUS+ projekt EUBILD-UNAKLIM was of great importance to us.

While conducting about 30 individual conversations, distributing 100 leaflets and displaying flyers and postcards, stakeholders were found and involved in the project. They were invited to the forthcoming multiplier events.
